To whom it may concern:

Beacon Aviation has produced several, high definition aerial images of the Tyler Pounds Regional Airport in Tyler, Texas over the course of the past few years. During this time period, Runway 4-22 was being reconstructed to serve as the Airport's primary runway. Beacon Aviation provided aerial photography that very clearly detailed construction progress and is so clear that the joints in the new runway concrete pavement are identifiable. After seeing the end products of their services and the timeliness in providing the imagery, I would recommend their services to others for this type of work.

Jonathan, good to get your email of support.

FYI, our meeting with the Smith County GIS Consortium was well received. Their Chairman, Bill Morales, Dir. Of Smith City 911, stated in a follow up call that it was excellent. We will be bidding on the aerial mapping for all of Smith county this next month, and we believe the odds of winning are quite high. Should we win and capture all of the county at 6" resolution (same resolution we used to comply with our AGIS mapping for KDUA), could you see where the airport could benefit? If so I would appreciate an email containing your thoughts so that we could incorporate it in our official bid response. Pls see the attached: 2015_0818_Approach & Departure Surface.pdf

Thanks again for your letter of support.

On another note we are about to perform a test that I believe you will find intriguing. We call it "Pencils on the Pavement"... we will be capturing our runway here at KJDD and scattered on the runway will be a handful of #2 pencils. Our mapping will be so detailed we hope to show you our ability to see each on clearly... measuring their width, depth, and length. ("What we measure... we manage.")

I would welcome your review of the same and to let us know if this capability has merit for payment management issues.

Have a blessed week!

FYI, please see the forwarded email below to KSA.

Also my meeting went well last week with Craig Lindholm, Airport Mgr/City Mgr Winnsborro.

regards,

Marty,

Glad to hear it. I'm sure the Airport would love to have a new aerial in terms of a benefit. There are no new approaches (at least that haven't already been planned and in the works) for TYR, so not sure we would need any additional data for FAA at this time.
